

### Tilting Type Check Valves

- Short body, small volume and light weight
- Shafts protrude on both sides of the body and allow the lever and counter weight to be mounted on the right or left, both for vertical and horizontal pipe applications.
- Disc swings freely. The disc opening depends on the flow velocity
- Adjustable weight offers the adaptability to the individual working conditions
- Rubberlined design on request
- Both metal to metal or resilient seating
- Maintenance free design

Part No	Description	Material
1	Body	Ductile cast iron EN-GJS-400-15
2	Disc	Ductile cast iron EN-GJS-400-15
3	Retaining ring	Steel S235JR
4	Sealing ring	EPDM
5	Hex. socket head cap screw	Stainless steel A2
6	Shaft	Stainless steel X20Cr13
7	Key	Steel Ck45
8	Hex. socket set screw	Stainless steel A2
9	Bearing bush	Bronze
10	Seal bush	Delrin
11	O-ring	EPDM
12	Cover	Ductile cast iron EN-GJS-400-15
13	Hex. bolt	Stainless steel A2
14	Lever	Steel S235JR
15	Weight	Cast iron EN-GJL-250
16	Key	Steel Ck45
17	Cover	Steel S235JR
18	Bolt	Stainless steel A2
